

Copperleaf + IFS

Together, we offer the first end-to-end asset lifecycle management solution.

Underpinned by **Industrial AI**, the combination of Copperleaf and IFS will allow our asset-intensive customers to deliver on their **moment of service** through strategic **allocation** and **execution** of CAPEX and OPEX—balancing expenditure, business objectives, risk, and optimal asset performance.

Embedded Benefits

End-to-end Visibility

Clear view to asset performance, needs, and risk

Spend Efficiency

Better use of CAPEX and OPEX

Composable Architecture

Solutions fit to your needs

Regulatory Compliance

Meet requirements, improve outcomes

Better Risk Mitigation

Understand impact of interventions

More Value

The right work at the right time

Better Decisions

Optimized planning scenarios

Industrial AI

Improve experience and results

Collaboration Tools

One single platform

“Asset Management requires integration of activities **across the whole life cycle**, not just consideration of individual life cycle stages.”

– ISO 55000: An Anatomy of Asset Management
