Northern Women's Infrastructure Network Launch event

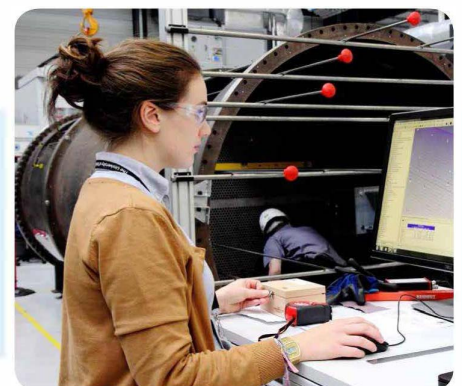

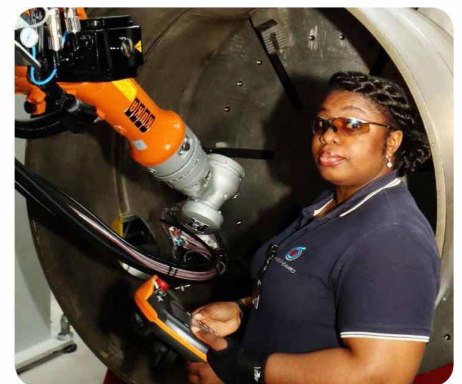

Thursday
24 January
2019
8am–1.30pm

An exciting new networking event supporting women working in the infrastructure sectors.

The Northern branch of the Women's Infrastructure Network (WIN) UK aims to bring together women working in infrastructure sectors – transport, utilities, communications, government and environmental – across the North of England

Founded by women at key regional businesses, Northern WIN aims to bring together like-minded women who want to expand their professional networks across industries, and share best practice for evolving equality of opportunity and career advancement.

This launch event is hosted by the Nuclear AMRC, part of the national High Value Manufacturing Catapult, and sponsored by Copperleaf and Walker Morris. It will include presentations from women working in senior roles in the UK's nuclear power sector, as well as networking opportunities and discussions on developing the group for the benefit of all. The half-day event is free to attend, and includes optional breakfast and lunch.

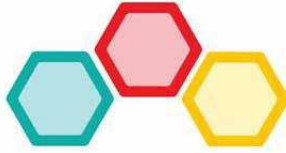

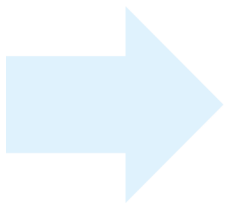

To register, go to:

 nwin-launch.eventbrite.co.uk

Introducing the Northern Women's Infrastructure Network

The Women's Infrastructure Network (WIN) is an inclusive global network with Chapters operating in the USA, Canada, Australia and the United Kingdom.

Each Chapter includes a number of regional groups to support infrastructure communities, provide networking opportunities and deliver events with local, national and global significance.

WIN (UK) was launched in 2011. Members meeting in London represent a diverse group across the entire spectrum of participants in the infrastructure industry and include members of public agencies, equity sponsors, infrastructure and pension funds, commercial and investment banks, law firms, financial, technical and insurance advisory firms, engineering and construction firms, operations and maintenance providers. Having representation from a wide cross-section of the infrastructure community allows for rich and insightful discussion across our industry.

Northern WIN seeks to provide the same supportive and facilitative forum, based in the North of England. Creating a Northern group enables participation by those who aren't based in London but still wish to be involved in the wider infrastructure community. Establishing Northern WIN will ensure the community can continue to strengthen and the impact women have within the industry can continue to grow.

Our aim is to:

- Create a strong network of contacts to foster professional opportunities and enable collaboration.
- Facilitate professional development and support for women in the infrastructure sector.
- Promote infrastructure as a viable long term career option with a supportive, industry recognised network for women.

Draft agenda

Launch event:
Thursday 24 January 2019
8am–1.30pm
Talks & workshop from 9am to 1pm

- Networking breakfast
- Vision for Northern WIN
